**VOLSKAS SE BANKNOTE
(Sien bladsy 8 & 9)**

Volkskas kan vir u die wêreld se munte kry

Volkskas is geldtalig

Geld praat baie tale. Rand. Dollar. Frank. Pond. Escudo. Yen. Mark. Gulde.

Volkskas was heel eerste in Suid-Afrika met 'n volledige *Numismatiese Diens*. Daarom is Volkskas by uitstek die muntversamelaar se bank.

Volkskas – selfs u plaaslike tak – kan u help om in muntstukke van oor die hele wêreld te belê, hulle te versamel of as geskenke te koop. Sorg ook dat u Volkskas se pragboek GOUE MUNTE by u naaste Volkskas-tak in die hande kry – die omvattendste tweetalige handleiding oor goue munte wat daar is. Dis maar een van Volkskas se talle uitmuntende dienste.

Volkskas kan al die geldtale praat. As u enige plek op aarde wil saampraat, kan U EIE BANK u help. Volkskas is u beste handelskontak met die wêreld. Met 'n landwye netwerk van by die 500 takke en agentskappe is Volkskas oral naby en tot u diens. Met 'n wêreldwye netwerk van by die 300 agente/korrespondente kan Volkskas tot in verre lande diens lewer en omsien na u belang.

TRAGIC DEATH OF "BILL MENNE"

Mr. W.J. "Bill" Menne, the well-known Transvaal numismatist, was murdered last month in his Louis Trichardt farm house by two Bantu intruders. His wife was seriously injured in the attack and at the time of writing she was reported to be progressing well.

In a talk to the Fourth South African Numismatic Convention held in Pretoria during 1970, Mr. Menne told how he began collecting coins in his youth, but never really obtained complete enjoyment from the hobby until he learnt to study the coins in his collection.

"It is never too late to start collecting. It took me 50 years to start, but in my old age my hobby has served a very useful purpose," he said.

He said his collection was very valuable and it was either locked up in a bank or housed in a special strongroom at home — wherever it was, it was unreachable to the people who so cruelly entered his house with the intention of theft.

The final sentences in his talk are prophetic. Discussing how he was to dispose of his valuable collection, he said he could donate it to a museum or some similar public institution.

"Leave it to one of the family or split it up between my heirs. Again I might decide to sell the lot and enjoy the proceeds in some other form. Whatever one does with his collection is his personal concern.

"I would, however, like to think that most of these coins will come back into circulation so that collectors in generations to come will have the same pleasure, fun, and excitement in hunting for, and finding that elusive coin, as I did during my lifetime."

Mr. Menne could not foresee his tragic end when he spoke in Pretoria, but the closing words of that speech portray the unselfish, human nature of the collector everyone knew so well.

NUMISMATIC GOODWILL AMBASSADOR CLAY READ

The American Numismatic Association's first officially designated goodwill ambassador has returned to work here following a pair of successful trips.

Clay Read, instrument laboratory material man in Dept. 57-11, makes goodwill trips throughout the world at least once a year.

His most recent ventures took him to Hobart, Tasmania, and Honolulu.

At the Tasmanian Numismatic Society Convention, he exhibited his commemorative coins of the Philippine Islands and was given the group's highest honor, receiving the third life

membership the society has ever presented.

In Honolulu, he received firstplace honors for his exhibit in the annual convention and show of the Hawaiian Numismatic Society.

A 17-year collector of coins, Read is a 24-year employee.

EDITORS NOTE:-

Our congratulations to Clay Read on his fine work as goodwill ambassador. We still have many pleasant memories of his visit to our convention in Pretoria in 1970.

BICKELS COIN & MEDAL NEWS MUNT & MEDALJENUUS

1. PUBLISHER / UITGEWER:
Bickels Coins & Medals (Pty) Ltd.,
151 Jeppe Str., JOHANNESBURG,
P.O. Box/Posbus 10690. Tel: 834-8210

2. EDITOR / REDAKTEUR:
Peter Brown.

3. SUBSCRIPTION RATES /
INSKRYWINGSFOOI:
South Africa and African Postal Union
— R2.00 (Post Paid) for six issues per
year. Single issues: 40 cents each.
Overseas (foreign) — \$3 for six issues,
or Airmail — \$9.

Suid-Afrika en Afrika Posunie — R2.00
(posgeld betaald) vir ses uitgawes per
jaar. Enkel-uitgawes — 40 sent elk:
Oorsee (buitelands) — \$3 vir ses uit-
gawes, of Lugpos — \$9.

4. CHANGE OF ADDRESS:

Please note that a change of address necessitates the making of a new address plate. This takes 4–6 weeks and can only be done upon receipt of a 50c postal order to cover the cost. Addresses will NOT be changed unless an amount of 50c accompanies the request for a change of address. Please state clearly what the old and new addresses are as well as what your subscribers code number is. This number appears on the envelope each month.

5. ADRESVERANDERING:

Neem asseblief kennis dat 'n adresverandering die maak van 'n nuwe adresplaat noodsaak. Dit neem 4–6 weke en kan slegs gedoen word as 'n posorder ten bedrae van 50c, om die onkoste te dek, die versoek vergesel. Adresveranderings sal NIE aangeteken word tensy die bedrag van 50c saam met die versoek gestuur word nie. Meld asseblief duidelik wat die ou en die nuwe adres is en gee ook u intekenaarskodenummer. Hierdie nommer verskyn elke maand saam met die adres op die koevert.

RENEWAL NOTICES:

Every subscriber will receive a renewal notice approximately 1 month before the expiry date of the subscription.

HERNUWINGS- KENNISGEWINGS:

Elke intekenaar sal omrent 'n maand voor die subskripsie ten einde loop, 'n versoek ontvang om sy intekengeld te hernu.

MAURITIUS COINAGE, 1971

(Reprinted from the Numismatic Circular, October, 1971. Published by Spink & Son Limited.)

Left: One of two new coins being issued by MAURITIUS is a ten-rupee piece with a portrait of the Dodo on the reverse (pictured). The bird was unique to the island and became extinct at the end of the 17th century. This is believed to be the first time it has been shown on coinage. The obverse of the coin carries a portrait of H.M. The Queen. Centre: Mauritius is to issue its first gold coinage. The 200-rupee piece (pictured) illustrates the story of Paul et Virginie, two lovers who were the subject of a tragic novel by Bernardin de St. Pierre. The story was set in the forests of the island. Right: The obverse of the coin carries a portrait of H.M. The Queen.

The first European to make landfall was a Portuguese — Captain Pedro Mascarenhas and the island group, which comprises Mauritius, its dependency Rodrigues and the French overseas territory of Réunion, is called the Mascareignes in his honour.

In 1598 the Dutch landed on Mauritius naming it after their ruler, Prince Maurice of Nassau. For forty years it was an important port-of-call for French, Dutch and English trading vessels; so important was it that in 1642, Tasman, the Dutch navigator, left from Mauritius on the epic voyage which culminated in the discovery of Australia.

The Dutch remained masters of the Island until 1710 when they withdrew. The French, realising its maritime importance claimed it in 1715 and renamed it Isle de France. For many years Isle de France was administered by the French East India Company. Under Mahé de Labourdonnais, who not only improved the quality of agriculture, but rounded up the "marrons" (escaped slaves) that had been terrorising the populace, there was established a naval base at Port Louis from which British ships were harassed and attacks launched on Britain's Indian possessions.

Mauritius flourished as a naval base playing an important role in the War of American Independence, the War of the Spanish Succession and the Seven Years' War. During the Napoleonic Wars it was known as "The Pirates' Nest" — a base for privateers whose main object was the British Indiamen.

In 1810 Britain dispatched four frigates to the Island which the French quickly sank. Four months later a full scale invasion was

launched and the French capitulated after a short resistance. Four years later the Island was ceded to the British Crown and the government of the day agreed to safeguard the French way of life — language, laws and customs — an agreement they duly honoured though English became, and remains, the official language of the country.

Under British rule the Island prospered. Slavery was abolished in 1833, sugar production grew, and the ports and dockyards flourished. Following the abolition of slavery Indian indentured labourers came to Mauritius to work in the sugar-cane fields and today people of Indian origin form the majority of the population of some 800 000.

Mauritius is increasingly becoming known as an excellent tourist centre. The Island is extremely beautiful, has good beaches and enjoys a sub-tropical climate.

In 1964 the Island was granted internal self-government and in 1968 Mauritius became an independent member of the Commonwealth. Government is by elected Legislative Assembly headed by the Prime Minister and his cabinet. Her Majesty Queen Elizabeth II, as Queen of Mauritius, is represented by the Governor-General.

THE DODO

Defenceless, good natured and delicious to eat it is astonishing that the Dodo survived so long. An ab-

normal member of a group of pigeons peculiar to Mauritius, its body outgrew the strength of its short wings. Between 1681-93 the last Dodo had been hunted and killed.

A few 17th century watercolour paintings are the sole evidence of another Dodo — the White Dodo of Réunion. No bones have been found, however, and it is only in Mauritius that this spectacular animal is known to have lived.

The other coins in the proof set are in circulation already in Mauritius. Coins of this series were first introduced in 1877.

There are to be issued 750 Proof sets containing the following nine coins in presentation case:

Coin	Metal	Diameter
Rs 200	gold 22 carat	27.76mm
Rs 10	silver 925 fine	35.00mm
Re 1	cupro-nickel	
Re ½	cupro-nickel	
Re ¼	cupro-nickel	
10 cents	cupro-nickel	
5 cents	bronze	
2 cents	bronze	
1 cent	bronze	
2,500 Rs. 200	Uncirculated gold (22 carat) uncased (available in proof form only in proof set).	
	Obv.: Portrait of H.M. The Queen by Cecil Thomas. Date 1971. Words QUEEN ELIZABETH THE SECOND	
	Rev.: Paul et Virginie. Design by Christopher Ironside. Denomination. Words MAURITIUS INDEPENDENCE	
	As specification above. The coin is appropriately of the same size as the old East India Company Mohur issued in the 18th and early 19th Century.	
50,000 Rs. 10	Uncirculated cupro-nickel uncased (available in silver proof set only).	
	Obv.: Portrait of H.M. The Queen by Cecil Thomas. Date 1971. Words QUEEN ELIZABETH THE SECOND	
	Rev.: The Dodo. Design by Christopher Ironside. Denomination. Words MAURITIUS INDEPENDENCE	

THE BATTLE OF ISANDHLWANA (ZULU WAR OF 1879)

By Dr. F. K. Mitchell.

(As reported in the SOUTH AFRICAN NUMISMATIC SOCIETY MONTHLY BULLETIN NO. 57 — December 1971).

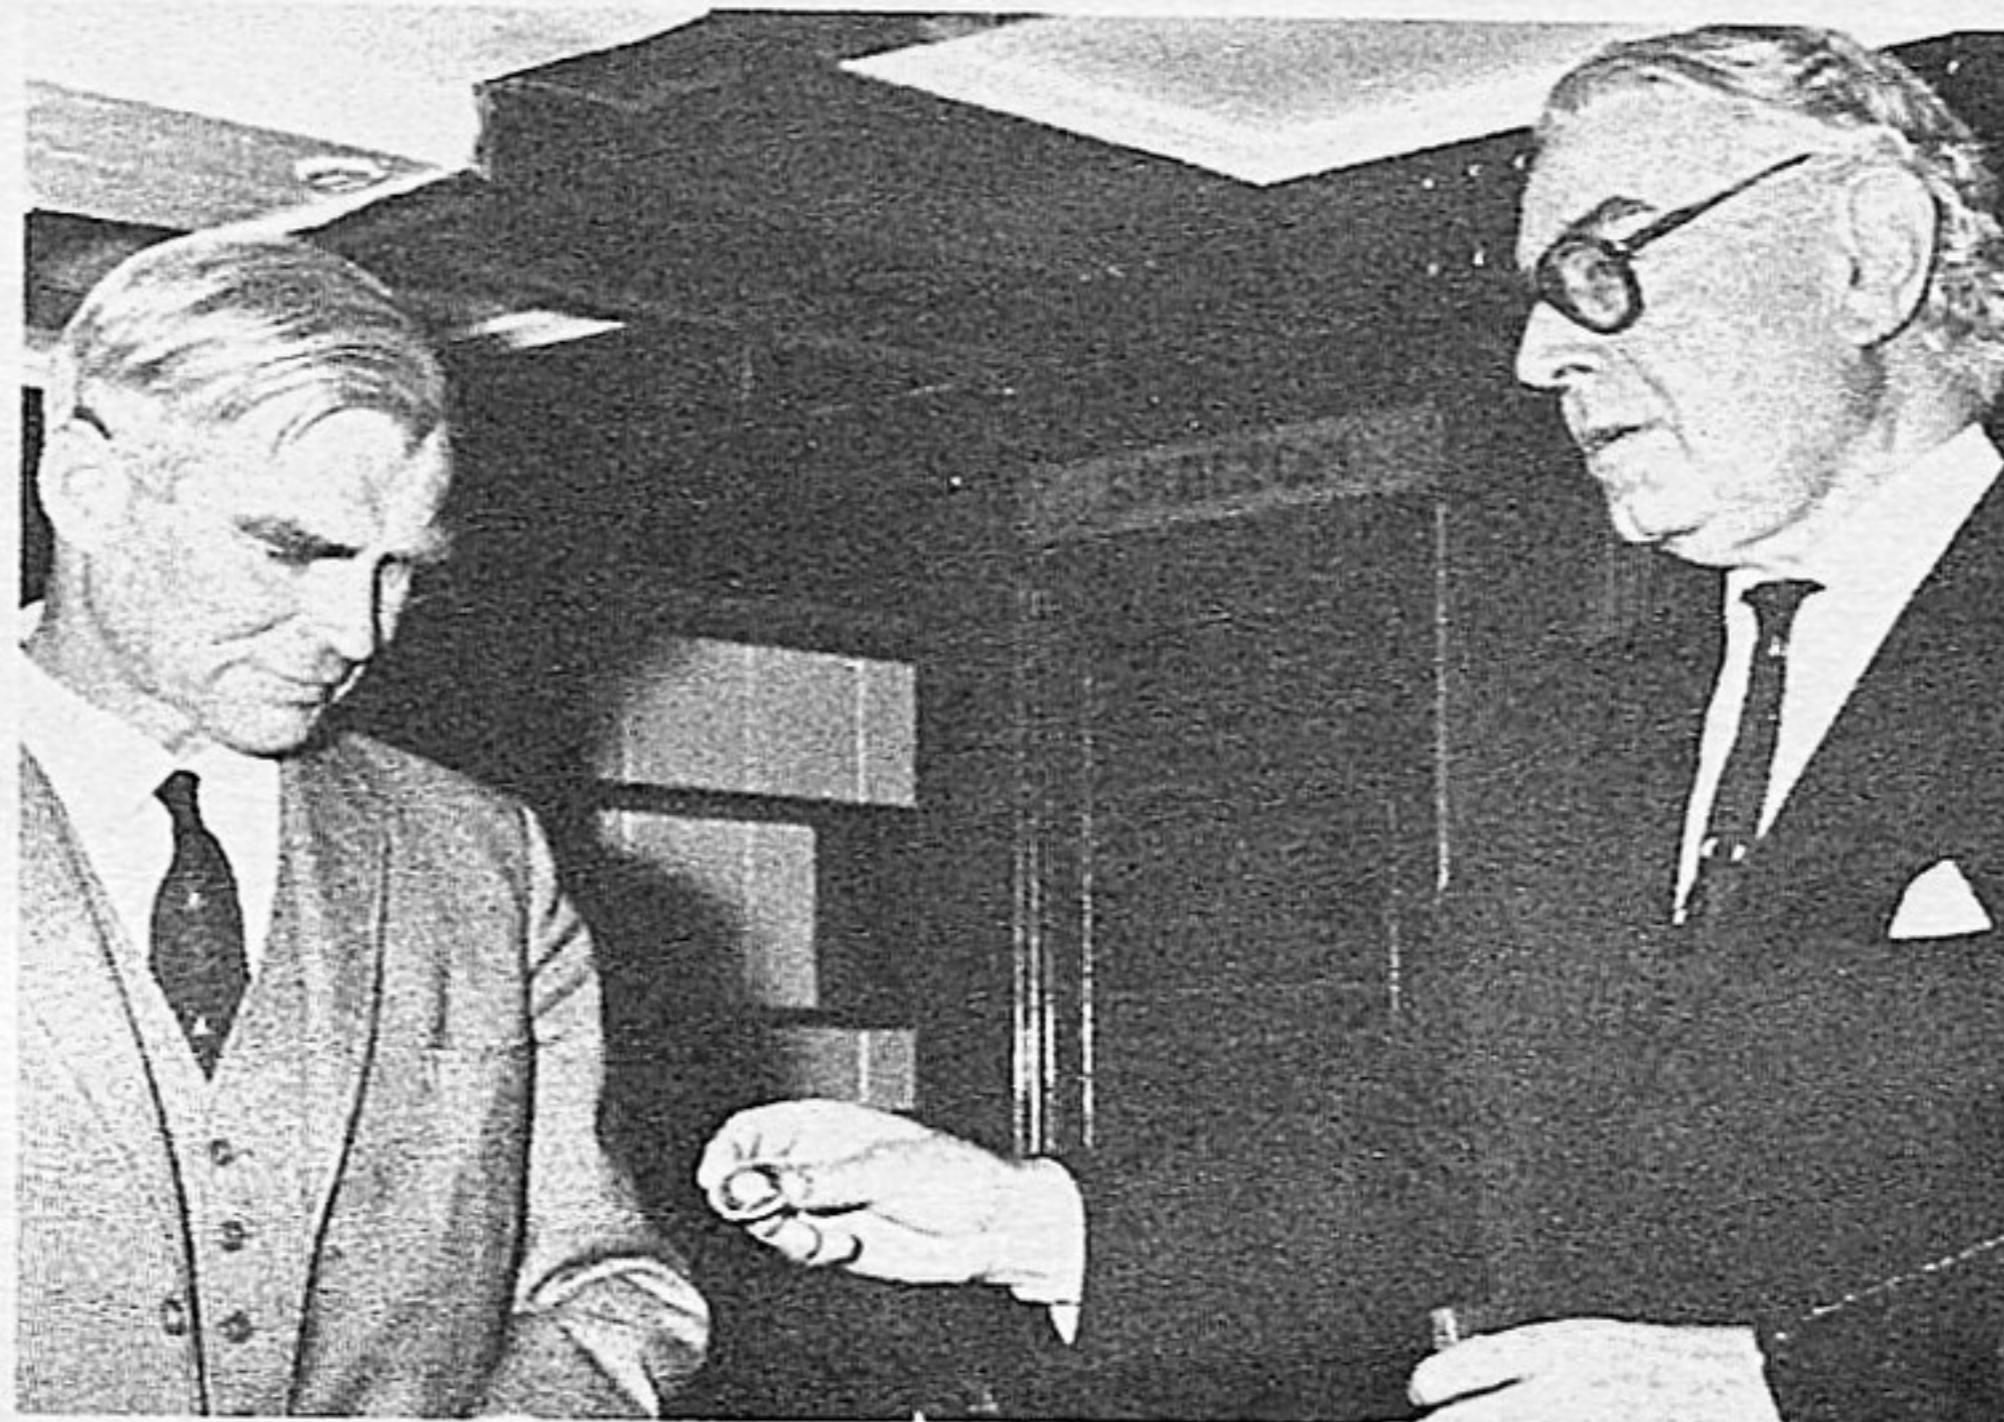

The next speaker was Dr. F. K. Mitchell, who delivered a graphic and most moving address on the Battle if Isandhlwana, which took place during the Zulu war of 1879. With the aid of large, hand-drawn maps the speaker indicated how the three columns British soldiers under the overall command of Lord Chelmsford had advanced into Zululand with the view to striking at Ulundi, the Zulu royal kraal, and engaging the enemy. Dr. Mitchell took pains at pointing out that the Zulus were not inexperienced fighters; on the contrary, the young men were under strict discipline and were trained for years in the arts of warfare. He also exhibited the two types of spears and the knobkerrie each Zulu carried apart from his shield, and he explained how these were used.

On 20th January, 1879 Chelmsford marched his force of approx. 4500 Europeans and Natives to Isandhlwana, a site he had selected as the most suitable, and there he established his camp but failed to form a laager. Shortly thereafter, acting upon intelligence reports received, he decided that the main Zulu army must be to the east of his position. Hence the next day, before dawn, he left camp with approximately half his troops to

meet this army. By this time however the Zulu army of some 23,000 men was, unbeknown to Lord Chelmsford, close to his now partly vacated camp at Isandhlwana, and on 22nd January attacked it. After a heroic stand the defenders were finally overrun and virtually annihilated; the casualties on the British side were 858 Officers and Men plus 471 Native Levies, whereas the Zulus lost approx. 3,000 men. The party which had left camp prior to the battle tried to get back but the men were cut down wherever they were found. Some tried to get back into Natal across the Buffalo river. The speaker particularly referred to a Lt. Mellville who had been instructed by his O.C. Brevet Lt. Col Pulleine of the 1st Batt. 24th Foot, to try and save the Queen's Colours and bring them back to Natal. On his way — in the flight to the Fugitives Drift he met a Col. Coghill who had injured his knee in an attack and could hardly walk but who has found a horse to carry him. When these two officers got to the swollen Buffalo river, Coghill managed to get across but Mellville's horse slipped and threw him into the strongly flowing river. He tried to

hold on to the colours but they were washed into deep water. Coghill rode back into the river but his horse was killed by a Zulu bullet. After a desperate struggle both officers got to the Natal side, but Coghill could go no further and Mellville refused to leave a fellow-officer. Both were overcome by the Zulus, and their bodies were found on 1st February, 1879. The colours were also subsequently recovered from the river, and on 28th July, 1880 Queen Victoria attached a wreath of immortals to the pole of the colours. Mellville as well as Coghill were posthumously awarded Victoria Crosses in 1907.

The usual tea break now took place, and after the Meeting had been re-convened Dr. Mitchell screened a series of colour slides he had taken during a visit to the battlefield of Isandhlwana, and on which could clearly be seen the landmarks Dr. Mitchell had referred to in his talk. He also indicated on the slides the cairns under which the fallen were buried plus various other monuments commemorating this bloody battle. The speaker furthermore exhibited 2 medals awarded to soldiers who had lost their lives at Isandhlwana.

Presentation on board H.M.S. Discovery. Lord Shackleton (Right) receives from Sir Vivian Fuchs (Left) Medallion No. 1 from the special minting of silver medallions to mark the 50th Anniversary of his father's death.

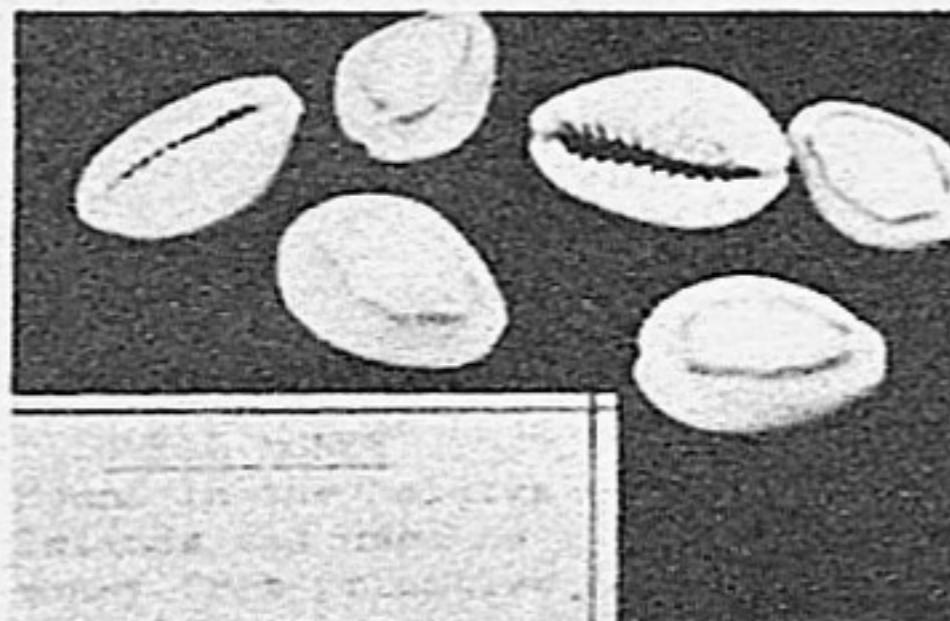

ODD AND CURIOUS MONEY

by Dr. Stanley Kaplan

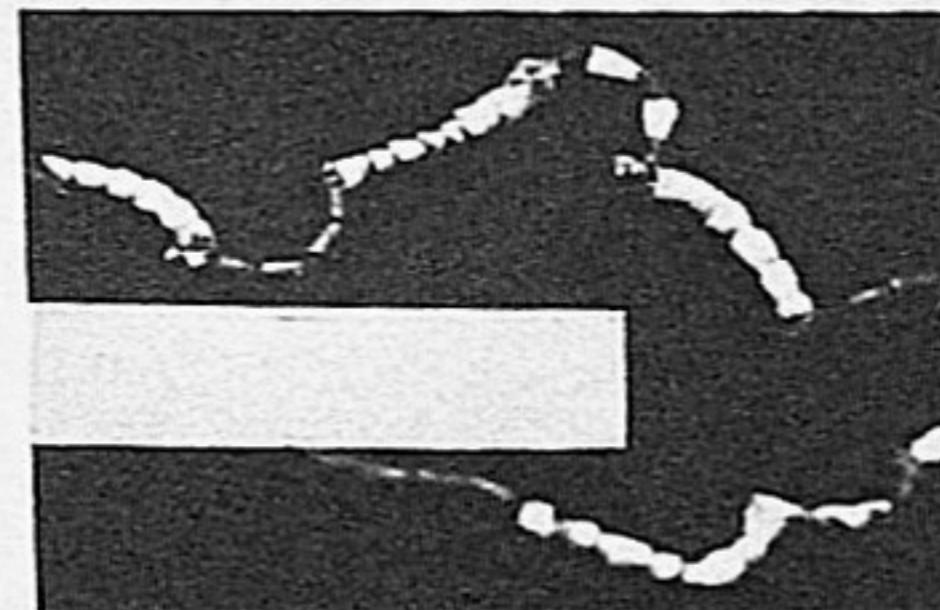

A TALK GIVEN TO THE JOHANNESBURG NUMISMATIC CLUB ON 29th APRIL 1971 AND ILLUSTRATED BY SLIDES

Dr. Kaplan pointed out that South African collectors are too conservative and restricted in their fields of collecting. Money of primitive people falls into two classes i.e. objects of practical value and ornaments. The talk was illustrated by slides showing the following:

1. STONE-MONEY OF YAP in the Caroline Islands. These vary in size from a few inches to 12 feet across and have a hole in the centre so as to be carried on a pole.
2. THE COWRIE SHELL found on the beaches of Africa, particularly Natal. Even now Cowrie shells circulate in parts of West Africa and French Guinea. Hundreds of years before the arrival of the white man, natives in many parts of the interior were accustomed to use this natural token as a standard of value. They are still recognised in revenue assessments in Sengal. Bushmen used strips of flat beads cut from Ostrich egg shells.

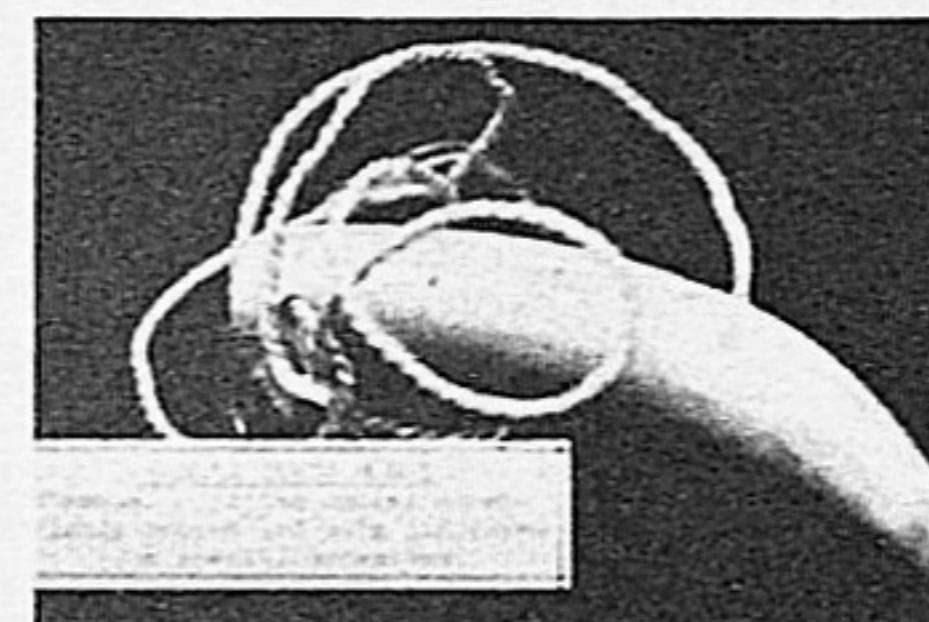

3. COIX SEED CURRENCY. These are the seed of grasses which become as hard as stone, white and polished. These were used in Pacific island groups of Micronesia and Melanesia.

4. SHOE MONEY. Silver ingots, called syue, are said to have served as money in China from the time of the Mongol Emperor, Kublai Khan (AD 1260 — 1295). For trading, the well known yuan pae, "shoe-money" or "syues tails", described by the Chinese as wan gin, meaning "fine silver" has been in circulation for some centuries. The lump is impressed with a stamp, which gave it its likeness to a shoe and the term syue, in Cantonese psi-ssu or fine silk, is thus explained.

5. AMERICAN INDIAN WAMPUM. These are tubular shell beads of the North American Indians, usually about $\frac{1}{4}$ inch by $\frac{1}{16}$ inch. Literally translated, Wampum (named by the English) means "strings of white". The Indians used these beads as we use diamonds.

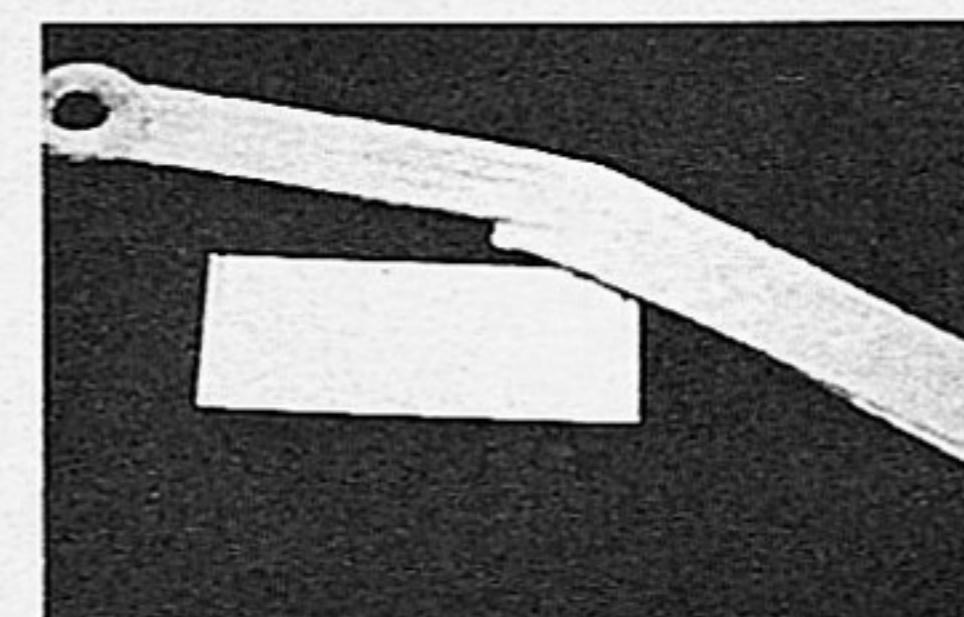

6. WHALE TOOTH. Ivory teeth from the sperm whale were used as currency in the Fiji Islands about the middle of the eighteenth century. They also serve as ornaments. Some teeth were dyed red with turmeric and this made them 20 times more valuable.

7. SIAM PACK SADDLE. These are made from four-sided bars of silver, slightly tapered, bent and cut part away, thus resembling the old pack saddle used in the Far East.

8. CHINESE KNIFE MONEY. The theory of its origin is that firstly a real knife, the base of the handle pierced for suspension, was used in barter; then shrinking in size, with edges blunted, useless as a knife but more convenient for currency; lastly the handle absorbing the blade, we have the "cash" remaining as money. Knife money was abolished about 221 B.C.

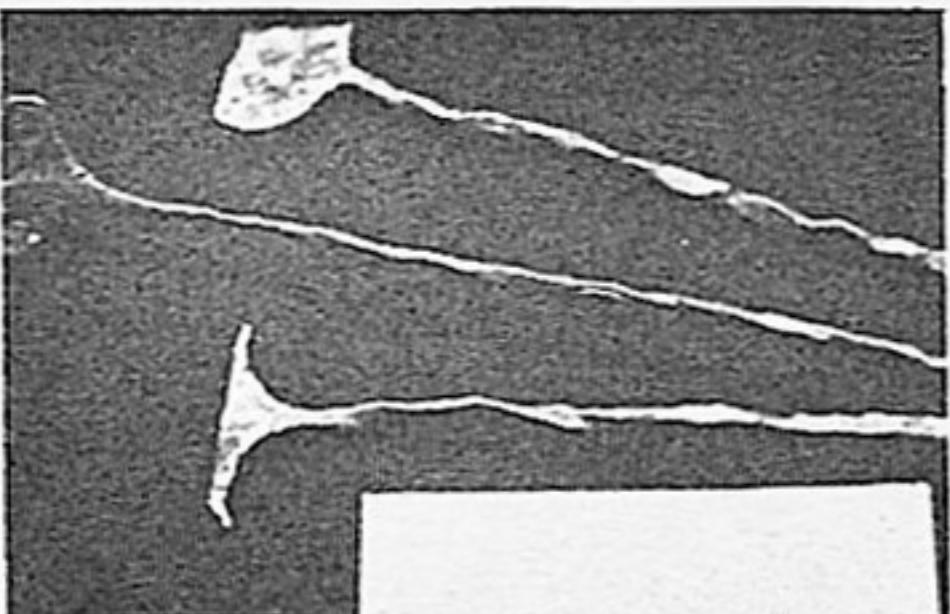

9. PIG MOUTH MONEY OR SILVER SHELL MONEY. This is made from a silver alloy in the shape of flat or almost flat shells, the one side covered with a yellowish-red substance made of burnt chicken's egg-yolk and the other side slightly convex is black and rubbed. Said to be used in marriage and divorce ceremonies in Northern Siam.

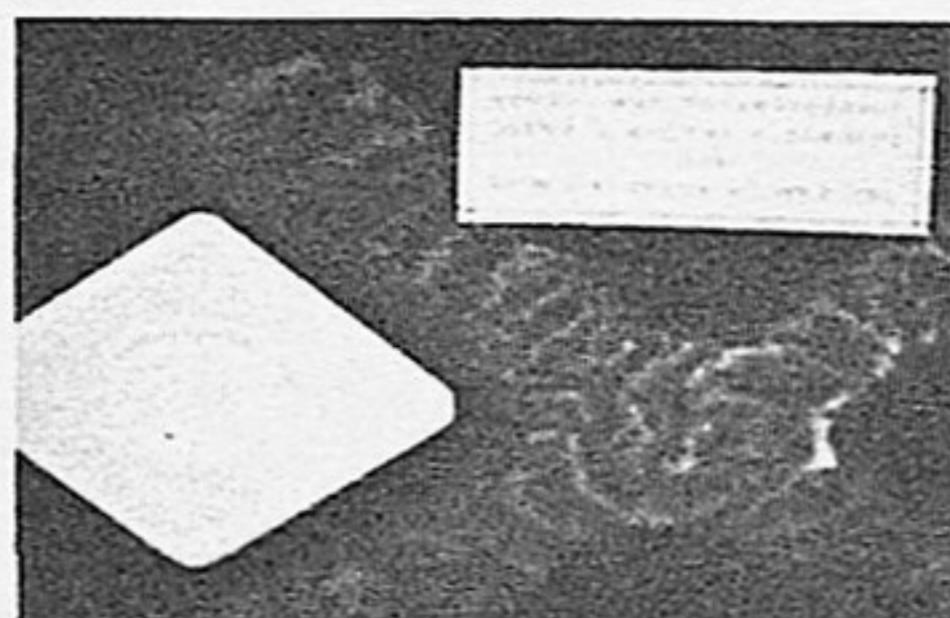

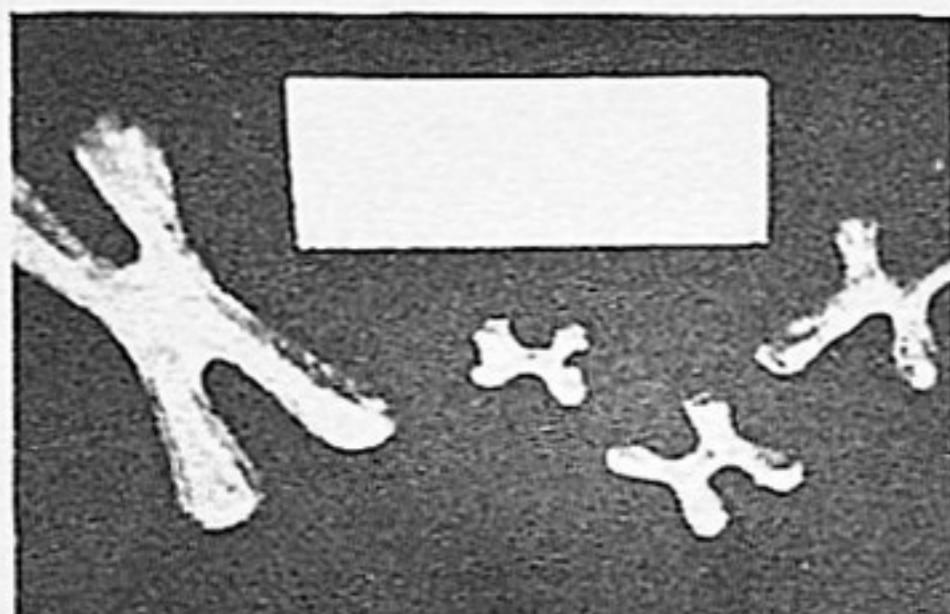

10. ANT NOSE OR GHOST HEAD MONEY. These are bronze metallic substitutes for Cowrie shells issued in China 612 to 589 B.C. Some authorities claim that the Chinese inserted these coins in the nostrils of the dead to prevent the entrance of spirits in the form of ants, hence the name Ant Nose or Ghost Money.

11. PORCELAIN CHINESE COINS. These colourful porcelain coins had their origin as gambling tokens about 1760 and were current as small change until about 1900.

12. GITZI PENNY. These are twelve to twenty inches long, both ends flattened, one in a wig shape and the other resembling a double-tail. They were used in French Guinea, Liberia and Sierra Leone, although they are generally associated with the Gitzi tribe of North-west Liberia.

13. KATANGA AND COPPER CROSS. These copper crosses were cast by digging a mould in the sand and pouring molten metal into it. They were used in the Belgium Congo by natives for purchasing brides.

14. TIGER TONGUE AND CANOE. The tiger tongue pieces are of silver and the boat-shaped ones were copper used by the Laos inhabiting the Mekong river valley near what is now Siam.

15. JAPANESE BEAN MONEY AND CHO GIN. These are small silver coins used to make up the correct silver weight measured out in Cho-Gin which is a silver bar increasing 1 x 5 or 3 x 1 inch.

16. FISH HOOK MONEY. They consist of a silver rod about an eighth inch thick, bent and cut to the necessary length to give them the correct weight, then stamped with a design. They were used from about the 16th Century until about 1800 on the West coast of India and Ceylon.

17. STAM BULLET MONEY. Siamese bullet money is made by pouring molten silver into a cloth covered mould completely submerged in water and then bent by five blows of the Smiths hammer. These coins get their name from the fact that they resemble old-fashioned bullets.

18. SILVER BU was used in Japan from 1837 to 1854. The ornaments on the outer margin on both sides are cherry blossoms.

19. TEA BRICK used in Tibet. This is manufactured by using the branches, twigs leaves or sweepings dried in the sun, broken up by beating with sticks on hot plates, sifted, steamed over boiling water and put into moulds and pressed. To give a richer colour, a little soot may be added to poor quality. The standards differ according to the fermentation, colour, weight and proportion of wood to leaf. Brick tea is still the ordinary currency of traders and travellers.

20. TIN HAT MONEY OF PAHANG IN THE MALAY PENINSULA. These were made of tin with a slight mixture of lead. Ceased to be legal tender in 1893.

21. GOD BELL MONEY OR DEOGANTES. These are made in Tibet. The folktale is that when God was distributing the good things, the Burmese went on the wrong day and so received "nats" (or evil spirits) instead of blessings. The bells or deoganta are beaten to placate and arrest these evil spirits.

22. BOARS TUSK MONEY. The boar's upper canines are knocked out and the tusks, having nothing to stop them, keep on growing and curving spirally. The more spirals, the higher the value.

23. BONE ARM MONEY. The arm-rings which form the currency of New Guinea, are made by the centre piece of shell being bored with a hollow bamboo, sand, and water, leaving a smooth round hole of the required size.

24. MANILLA. The slave coast, as one would expect, is the home of the manilla currency which, as the name implies, is closely connected with the Portuguese or Spanish slave trade. These rings originally of copper or brass, later of iron or a mixture of metals, thus became the dominating currency from the Gold Coast to the Lower Niger. Rings and bangles worn as ornaments or used as currency, are found in all metal-using countries.

25. CARTWHEEL TWOPENCE. In 1797, during the reign of George III of England, these copper coins weighing two ounces, were used and called cartwheels because of their size and were used by undertakers to close the eyes of the dead.

26. BRASS FROG MONEY. This life-size brass frog comes from the Bamoun area of the French Cameroons in Africa, where it was used for money. The frog is made as follows: A model was made in bees-wax and after it hardened, it was covered with a mass of damp clay, which was then permitted to dry thoroughly. Then it was heated and the melted wax permitted to run out of a hole. To replace the wax, molten brass was poured in and when the brass solidified, the mould was broken and the frog carefully smoothed down with a file.

In conclusion, Dr. Kaplan said that these imaginative, and in many instances, beautiful objects used as currency, held an everlasting fascination. It would now appear that in actual fact, Britain has made a crown that contains 3 cents worth of nickel. America has come out with a sandwich-copper to replace the little bit of nickel which they hope to save. These coins are, to say the least, ODD AND CURIOUS.

OUR COVER:

The denomination of this bank note is given in three languages.

It also shows figures of 10 and 20 indicating both the £10 and R20 values.

Note the serial number.

VOLSKAS SE NOTE IN SUIDWES-AFRIKA

deur C.L. ENGELBRECHT,
PERSELE-BESTUURDER BY VOLSKAS-HOOFKANTOOR.

Met die goedkeuring van die Suidwes-Administrasie kon handelsbanke in Suidwes tot 1960 hulle eie note in omloop bring. Barclays en Standard Bank en Volkskas wat eers veel later op die toneel verskyn het, het van hierdie reg gebruik gemaak. Nederlandse Bank het van die Reserwe Bank Note van die Unie van Suid-Afrika vir hulle behoeftes ingevoer.

Op die note wat Barclays Bank in omloop gebring het staan o.a.: „Suidwes-Afrika wettige betaalmiddeluitgifte.”

Hierdie banknoot is gedek deur sekuriteit gehou deur die Administrateur van Suidwes-Afrika en is in terme van en onderhewig aan die bepalings van die Suidwes-Afrika banke proklamasie 1930 wettige betaalmiddel.”

Op Standard Bank se noot staan slegs:

„Hierdie noot is gedek deur deposito's by die Regering”.

Die vroegste verwysing na Volkskas se note in Suidwes-Afrika het ek in 'n berig in Die Suidwester van 1947 raadgeloop. Die melding is terloops maar is van meer as verbygaande belang omdat daar toe alreeds aan die kern van die saak geraak is, nl. die behoeft aan eenvormigheid in die uitgifte van banknote, wat uiteindelik daartoe sou lei dat die Reserwe Bank hierdie funksie sou oorneem en die handelsbanke die reg sou ontsê om hulle eie note as wettige betaalmiddel in Suidwes in omloop te bring.

Die berig lees soos volg:

„MISKIEN SLEGS NOTE VAN RESERWEBANK VIR SUIDWES

Die wenslikheid van die instelling van een uniforme stel banknote,

soos uitgereik deur die Suid-Afrikaanse Reserwe Bank al dan nie, is deur die Administrateur met sy onlangse besoek aan Pretoria met die Waarnemende Eerste Minister mnr. J. H. Hofmeyr, in Pretoria bespreek. In 'n personderhoud het die Administrateur daarop gewys dat daar tans drie soorte note in omloop is in die Gebied, nl. die van Barclays Bank, die Standard Bank en van die Reserwe Bank. Volgens die Administrateur, bestaan daar 'n moontlikheid dat Volkskas ook eersdaags 'n plaaslike tak sal open en dan sal hierdie onderneming natuurlik ook vir hul eie note moet sorg. „Die huidige toestand van sake is in sommige opsigte uiters onbevredigend,” het die Administrateur gesê.

teur verklaar. „Daar is gevallen waar' naturelle kom kla het dat hulle gekul is deurdat waardeloze koepons of ander stukkies gekleurde papier, wat hulle vir note aangesien het, aan hulle oorhandig is. Wanneer slegs een bepaalde soort noot in omloop gebring word, sal hierdie gevare grootliks uitgeskakel wees.”

“Die moontlikheid” waarvan die Administrateur volgens die berig gevalle was, was op daardie tydstip eintlik 'n sekerheid, want op 12 April 1947 is Volkskas reeds as handelsbank in Suidwes-Afrika geregistreer, alhoewel die bank eers op 20 Oktober 1948 in Windhoek begin sake doen het. Hierna het dit nie lank geduur nie voordat Volkskas in die spore van die twee ander banke wat al in die gebied gevestig was volg en ook sy eie note uitgereik het. Voordat dit egter gedoen kon word moes die goedkeuring van die Administrasie verkry en die feit dat die Volkskasnote voortaan wettige betaalmiddel sou wees, in die Staatskoerant gepubliseer word. Die note was teen die tyd dat die publikasie moes verskyn reeds vir 'n geruime tyd in besit van die bank se Windhoek-takkantoor en belangstellendes en nuuskieriges het aanhoudend navraag daaroor ge-

doen by die amptenare. Dit kan daarom verstaan word dat hulle met besondere afwagting uitgesien het na die verskyn van die betrokke Staatskoerant. Die kennisgewing waarop almal gewag het, het toe eindelik op 15 Junie 1949 in Staatskoerant Nr. 1436 verskyn en is beliggaam in Goewermentskennisgewing Nr. 193/194, en hierna kon die note te voorskyn gebring word.

"No. 194 15 Julie 1949

UITGIFTE VAN BANKNOTE

Hierby word kennis gegee dat Sy Edele die Administrateur ingevolge artikel negentien van Proklamasie 29 van 1930 die bank "Volkskas Beperk", middels 'n skriftelike permit, onderteken deur die Sekretaris van Suidwes-Afrika op een-en-twintig Junie 1948, gemagtig het om banknote in die Gebied uit te gee"

Miskien moet ons hier meer besonderhede gee oor wat presies op daardie dag gebeur het. Alhoewel die Windhoek-tak van Volkskas geweet het dat die betrokke Staatskoerant waarin die kennisgewing oor die note sou verskyn op 15 Julie gepubliseer sou word, kon hulle tog nie enige van die note uitreik alvorens die betrokke koerant amptelik verskyn het nie. Mn. Wolfaardt, die destydse bestuurder, het toe besluit dat hy die Staatskoerant by die drukkers sal gaan inwag, want in die bank het reeds van sy kliënte gewag om huis op die eerste dag van uitreiking van die note te bekom. Die bank sou eenuur vir die publiek sluit, en dit was reeds hier kortby half een toe die eerste Staatskoerant eers klaar gedruk en gebind is. Met hierdie koerant onder sy arm het die bestuurder, om sy eie woorde te gebruik "gehاردloop dat hy bars" om die note daardie selfde dag nog aan sy kliënte uit te reik. Oor die ontvangs van die note deur die publiek, skryf die destydse bestuurder soos volg aan sy Hoofkantoor:-

"Die note het goeie byval gevind by 'n paar van ons kliënte wat toevallig in die kantoor was om half-

Volkskasnote... 'n Fortuintjie... 'n Versamelaarsdroom...

VERDWYN VAN DIE TONEEL (in rook)

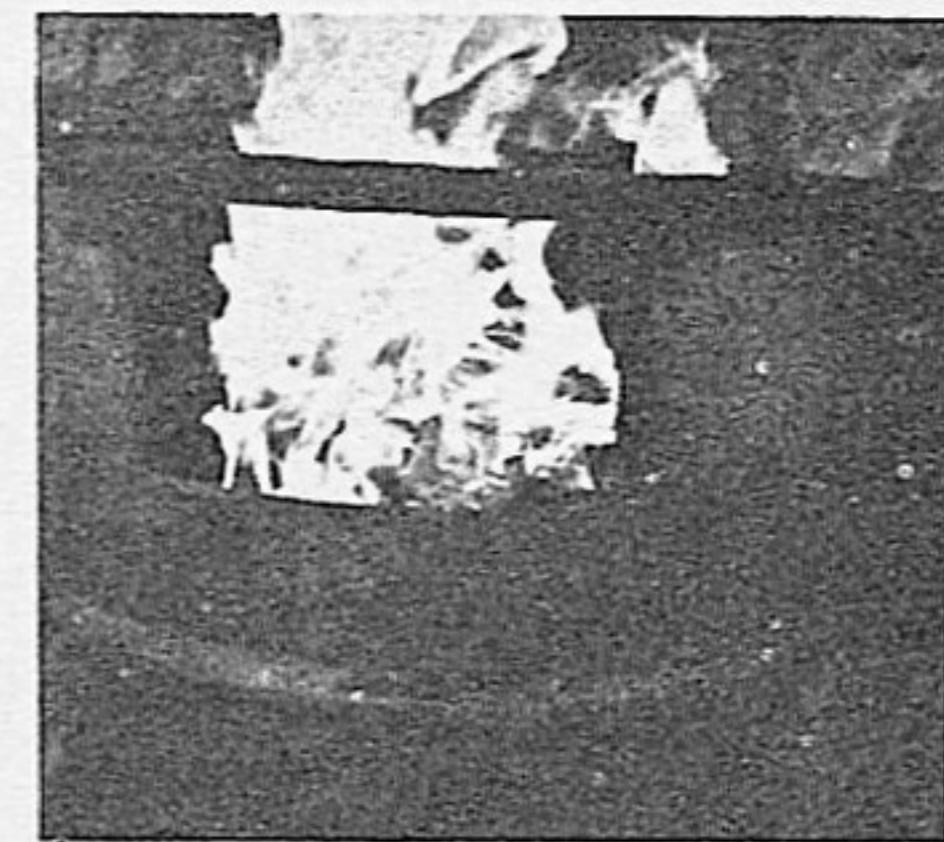

31 Desember 1961 was vir bankklerke in Suidwes-Afrika die laaste dag van „eie“ note – na dié datum het die Reserwebank verantwoordelikheid aanvaar vir die Gebied se note. Dit het meegebring dat alle gekanselleerde note voor daardie datum verbrand moes word. Geldverbranding – selfs vir 'n bankklerk – is 'n ongewone werk, maar na 'n paar probeerslae word daar 'n tegniek ontwikkel.

1. Gaar 'n bondel op tot £25.000. Neem 'n emmer lampolie... week die note daarin om „lekker“ te brand.

2. Gereed vir die brand! (Die ou petroldrom in die bank se agterplaas is 'n veilige oond vir algehele vernietiging. Dit het voor die tyd van die lampolie en petroldrom gebeur dat note „uit verbranding“ ontsnap en dat die bank vir 'n tweede keer moes betaal om sy note se naam hoog te hou!)

3. Elk en ieder se droom gaan in rook op! Moenie probeer red nie – jou hande en toekoms mag brand!

4 & 5. En terwyl jy die vurige offer filosofies en pligsgetrou betrag is daar tyd vir 'n dampie – 'n dampie wat om die geleenthed waardig te wees, „waardig“ aangestek word.

3

1

4

2

5

een toe ons die note te voorskyn gebring het onmiddellik nadat die Staatskoerant uit die pers gekom het", en later weer: "Behalwe in die geval van een winkelier wat die aanmerking 'of daar nou genoeg dekking vir die goed is' teenoor iemand gemaak het wat dit aangebied het in betaling van 'n rekening, het ons note baie goeie ontvangs gehad. Ons word daagliks nog gekomplimenteer met die uitgawe daarvan. Baie mense, nie kliënte van ons nie, kom om die note te besigtig en oor die algemeen word die mening uitgespreek dat ons note mooier as die van ander banke en die kleure ook meer opvallend is."

Die note het dan ook werklik 'n mooi voorkoms en die ontwerp daarop is baie paslik. Op elke noot verskyn 'n tipiese Suidwes-toneel. Op die £5-noot word 'n waterval in die Okavangorivier gesien. Op die £1-noot verskyn 'n gedeelte van Windhoek met die Lutherse Kerk op die voorgrond en die Administrasiegeboue op die agtergrond. Op die £10-noot verskyn 'n dorpie uit die ou dae. Volgens sommige is dit óf Omaruru óf Keetmanshoop óf Karabib. Andere meen dat dit 'n saamgestelde foto is en nie 'n spesifieke plek verteenwoordig nie.

Die eerste note-uitgif dra die datum 1 Junie 1949 en het uit drie denominasies bestaan: £5, £1 en 10/- Die note is onderteken deur die destydse hoofbestuurder en stigter van Volkskas J. J. Bosman en C. J. Wolfaardt, Hoofagent (die bestuurder van die Windhoek-takkantoor van Volkskas). Die note, tweetalig soos die van die ander banke, het soos die van Barclays Bank die waarde van die denominasies ook in Duits aangegee: Zehn Schillinge, Ein Pfund en Fünf Pfund. Volkskas se note is deur die bekende drukkers Waterlow & Sons van London gedruk.

Die bewoording met betrekking tot die note-uitgif het gelees:-

"Hierdie banknoot is 'n wettige betaalmiddel en is gedeck deur sekuriteit wat by die Sekretaris vir Suidwes-Afrika gedeponeer is kragtens die Bankeproklamasie 1930."

Die tweede uitgifte van die note het op 4 Junie 1952 geskied. Die note dra dieselfde handtekeninge. Mn. Bosman is 'n paar weke na dié datum oorlede.

Vroeg in die begin van 1958 het Waterlow & Sons Ltd. opdrag ontvang om die volgende denominasies en oplaag vir Volkskas te druk:-

10-sjiling note	:	£10,000
£1-note	:	£50,000
£5-note	:	£40,000

Die datum op die note sou 1 September 1958 wees.

Die drukkersplate (wat in veilige bewaring by Lloyds Bank gehou is), moes op versoek van die Suidwes-Administrasie deur die Hoë Kommissaris van London vrygestel word en aan die drukkers beskikbaar gestel word.

Tot 1958 was dit die gebruik om note half voltooi van die drukkers te ontvang in soverre dat die Hoofagent se handtekening en datum eers in die Unie aangebring is. Met die druk van bogemelde oplaag is daar besluit om die note ten volle te laat druk en voltooid in te voer met K.H.T. Lining as Hoofagent (toe bestuurder van die bank se Windhoek-tak) en J. A. Hurter as Hoofbestuurder. Die besending met die note sou uit een of meer verseëld kiste bestaan wat direk na Walvisbaai gestuur word. Die note sou ná inklaaring onder polisiebegeleiding saam met 'n senior amptenaar van die bank na Windhoek geneem word. Die seëls sou onder toesig van Administrasie-amptenare in Windhoek gebreek word. Die waarde van die note sou wees die vry-aanboord waarde van die drukkerskoste.

Dit is nogal interessant om op die "verskonende" toon oor die duurder koste vir die druk van die note uit Waterlow & Sons Ltd. se brief van 31 Julie 1958 te let. In 1952 was die koste £9-4-6 per 1 000 vir 90 000 note terwyl hierdie besending £13-8-9 per 1000 vir 78 000 note kos. Die brief gaan dan voort om die hoër koste te motiveer:-

"This is due to two factors, firstly because the considerable preparatory work before printing which is the same irrespective of the quantity ordered has on this occasion to be spread over a

smaller quantity of notes, thereby increasing the unit cost, and secondly because production costs have increased since 1952.

Wages in our Industry are governed at a national level by the British Government's Interim Index of Retail Prices which started in 1947 at 100, and in April 1952 when your last order was placed had risen to 135, and now stands at 169. You will therefore appreciate that in spite of our efforts it has not been possible to prevent production costs increasing, but we would assure you that these increases have been kept to a minimum."

In Maart 1959 het Waterlow & Sons Ltd. laat weet dat hulle twee kaste note met die "Tantallon Castle" vanaf London op 4 April 1959 versend het na Walvisbaai. 'n Onderrekenmeester, mn. N. C. Erasmus van Volkskas, Windhoek-tak en sersant Williams van die S.A.P. het die note in ontvangs gaan neem.

Nog voordat hierdie besending in die land aangekom het, is daar besef dat hierdie note slegs vir 'n beperkte tyd in die bank se behoeftes sou kon voorsien. Hoewel daar aan 'n verdere oplaag gedink is, veral met spesiale inagneming van die tydsduur voordat die uitvoering van 'n bestelling geskied, het die bank, omdat dit op daardie tydstip nog nie seker was of die pondnote ná desimalisasie in omloop sou bly nie, terwille van die koste besluit om voorlopig nie 'n nuwe oplaag te druk nie.

Nadat die Suidwes-Administrasie daartoe oorgegaan het om hulle banksake deur middel van Volkskas te verrig, het die takkantoor te Windhoek as gevolg van die groot kontanttrekkings wat deur die Administrasie gedoen word, 'n besondere vraag na £10-note ondervind. Om in hierdie behoeftes te voorseen moes gereeld Reserwebanknote ingevoer word. As gevolg van die voordele wat dit vir 'n bank inhou as hy sy eie note kan uitreik, is daar besluit om ook eie £10-note te laat druk. Ook is daar 'n opdrag gegee om 'n verdere oplaag van 100,000 £5-note onder datum van 1 September 1959 te laat druk. Omdat hierdie note die bank egter

moes deursien tot die begin van 1961 — die datum van desimalisasié — is die bestelling kort daarna na £200,000 verhoog en daar is verder besluit om onmiddellik aan dag aan die drukkersplate vir die randnote te gee. Waterlow & Sons Ltd. is versoek om proewe van die bestaande note voor te lê waar die pondwaarde slegs deur randwaarde vervang word en 'n ontwerp vir die £10-note moes ook gedoen word. Teen hierdie stadium was dit duidelik dat die note ná desimalisasié nog in sirkulasie sou bly totdat dit weens slytasie onttrek moes word.

Vroeg in 1960 het die firma Waterlow & Sons Ltd. hulle ontwerp vir die £10-note voorgelê. Die koste hiervoor sowel as die drukkersplate het £2 065 beloop. Ook is plakvoorbille voorgelê van hoe die randnote sou lyk met die vervangde pondwaardes. Die Suidwes-Administrasie het die note goedkeur en die volgende oplaag is bestel:

R 1-note	:	R50.000
R 2-note	:	R100.000
R10-note	:	R80.000
R20-note	:	R100.000

Interessant is die feit dat toe die Administrasie van Suidwes hierdie ontwerpe en oplaag goedkeur op 24

Februarie 1960 die skrywe ook die waarskuwing bevat het dat: "wanneer u 'n bestelling plaas vir die druk van die nuwe note, geliewe in gedagte te hou dat die moontlikheid bestaan dat 'n agentskap van die Suid-Afrikaanse Reserwe Bank dalk in die Gebied geopen sal word." Gevolglik is die firma Waterlow & Sons Ltd. in Maart gevra om die werk aan die £10-note en die randuitgifte voorlopig te staak. Dit was die begin van die einde van eie note deur die handelsbanke in Suidwes. Op 2 Januarie 1962 het die Reserwe Bank verantwoordelikheid aanvaar vir banke se note-uitgifte. Reeds gedurende 1961 het die Windhoek-tak van die Suid-Afrikaanse Reserwe Bank begin met die kanselering van die banke se notevoorraad. In hierdie verband is die volgende prosedure gevolg: met die samewerking van Volkskas se takkantoor te Windhoek het die Suidwes-Administrasie die 10-sjelling en R1 denominasies van note by wyse van 'n pons gekanselleer. Die bank moes dan verantwoordelikheid aanvaar om hierdie note te verbrand. £5-note is terug gehou om afsonderlik afgeskryf te word wanneer hulle in Januarie 1962 aan die plaaslike tak vandie Reserwe Bank oorhandig word.

MET VRIENDELIKE VERGUNNING VAN "OPSAAL"
— DESEMBER 1971

AFRIKAANS IN DIE NUMISMATIEK

Die bygaande kwotasies uit 'n pryslys bewys dat die gees gewillig is maar dat die vlees maar nog baie swak is. Hierdie pryslyste word gereeld deur 'n sekere munthandelaar aan sy kliënte gestuur en die inhoud sal ongetwyfeld interessante en amusante leesstof verskaf. Ons dink veral aan die (baie?) amptenare wat self muntversamelaars is.

Ons gee 'n spesiale afslag aan alle cliente wat hoer as die aangenoemde waarde aanbid.

Alle items angebid sal verkoop word aan die hoogste aanbod wat ontvang word sonder geen aanmerking.

Alle items angebid is streng gegrader en gegrader as aangemeld.

Ons gee net die aangenoemde waarde van die muntestukke, wanneer u 'n aanbod maak kan u bo of onder die aangenoemde waarde of u kan op die aangenoemde waarde aanbid, u kan enige aanbod maak wat u wil, alle muntestukke moet verkoop word, bid met gerus.

Posgeld en assersie sal by getel word op alle rekens.

Sewe dae terugstuur voordeel sal gegee word waar kooper nie tevreden is met ons gradering nie sal u kontant ten volle terugbetaal word.

Ingeval van twee personele die selde aanbod maak vir een munt, sal die persoon wie se aanbod form eerste ontvang word, sal die gelukkige een wees.

Die titel aan die muntestukke bly met die katlog tot u kontant in vol betaal is.

PORCELAIN COINS

Here is an opportunity for the numismatist with a discriminating taste and an eye for future investment potential.

What can almost certainly be considered South Africa's finest and largest collection of Porcelain and Mother of Pearl coins, is being offered for sale.

The seller is prepared to part with the collection, at cost, even though prices have risen steeply the past year.

The collection consists of:-

(a) 426 GERMAN PORCELAIN PIECES	PRICE ... R2350.00
(b) 101 SIAMESE PORCELAIN PIECES	PRICE ... R 290.00
(c) 79 SIAMESE MOTHER OF PEARL PIECES	
6 DIFFERENT SIZES OF ROUND AND PANEL SHAPES	PRICE ... R 275.00
(d) 5 CATALOGUES ON GERMAN PORCELAIN COINS	

OR

THE COMPLETE COLLECTION AT ...

R2750-00

AT R16.00

DEUTSCHLAND

10 D.M. 15.5 G
32.5 MM
LEGAL TENDER - LIMITED ISSUE

The 1971 issue of 10DM. coins in 625/1000 silver of the 1972 Olympics in Munich, have now been released by the Federal Republic of Germany.

Striking in appearance and design these coins were again struck in equal quantities by the four German mints:— G(KARLSRUHE) — F(STUTTGART) — D(MÜNCHEN) — J(HAMBURG).

Each coin carries its own mintmark.

No sooner were the coins released than they were again in short supply. It is almost certain that they will again be as popular as the 1970 issue.

WE OFFER THE SET OF FOUR COINS WITH THE FOUR MINTMARKS G—F—D—J.

PER SET R16.00
